

# INSTALLATION INSTRUCTIONS

## TO INSTALL SINGLE & DOUBLE HANDLE KITCHEN FAUCETS

Thank you for purchasing this Wasserman® faucet. Anything missing or damaged, please do not return to the place you purchased. Call Toll Free at 1-866-670-6190 and we will send you replacements.

1. Turn off water at the supply valve under the sink or at the main water supply, disconnect the supply line, and remove old faucet.

Clean and dry surface area where new faucet will be mounted.

2. Position the faucet (A) on the sink surface (2.1).

Hand tighten the mounting nuts (B) to the faucet (A) tailpieces on the underside of the sink (2.1).

- 2-1. If faucet is equipped with spray.

Insert spray assembly down through the spray support and sink. Attach spray assembly hose to the connection beneath the faucet by tightening the swivel nut by hand, then use pliers (not included) for 1/4 extra turn. be careful not to twist the hose or overtighten the nut.

3. Connect the Water Supply Lines using a flexible braided supply line (3.1) (not included), connect the end with 1/2 in. female IPS to the tailpiece (3.2) of the faucet. Hand tighten. Do not overtighten. Install the other end of the supply line (3.1) to the shut-off valve or supply tube.

**NOTE:** Consumer should follow the directions on the supply line and if you have any questions about proper installation of the supply line, consult the manufacturer of the supply line.

**NOTE:** Do not use plumbers tape on connections, this will void the warranty. If the washer of the supply line is damaged, change to new one before install to the faucet.

**DO NOT INSTALL SUPPLY LINE WITHOUT INSPECTION.** Leakage will come from the supply line and possibly cause water damage to your house.

4. Turn water supply or shut-off valve back on and check for leaks. If leaks occur, tighten nuts slightly.

5. Remove aerator (5.1) from the spout. Turn on the faucet (A) and run the water for at least 30 seconds to flush out water lines. Turn off the faucet (A) and replace aerator (5.1).
