

INSTALLATION INSTRUCTIONS TO INSTALL SINGLE & DOUBLE HANDLE SHOWER FAUCETS

Thank you for purchasing this Wasserman® faucet. Anything missing or damaged, please do not return to the place you purchased. Call Toll Free at 1-866-670-6190 and we will send you replacements.

1. Turn off water at the supply valve under the sink or at the main water supply, disconnect the supply line, and remove old faucet.

Clean and dry surface area where new faucet will be mounted.

2. Check that flat side of attached sealing gasket (2.1) faces wall. Insert tub faucet body (A) into wall.

3. Hand tighten the mounting nuts (B) to the faucet.

4. Connect water supply lines (4.1) (not included) from house to inlet tubes of tub faucet body (A) using coupling nut (not included). As you face the tub faucet body (A), hot water should be on your left, cold water on your right.

NOTE: Consumer should follow the directions on the supply line and if you have any questions about proper installation of the supply line, consult the manufacturer of the supply line.

NOTE: Do not use plumbers tape on connections, this will void the warranty. If the washer of the supply line is damaged, change to new one before install to the faucet. **DO NOT INSTALL SUPPLY LINE WITHOUT INSPECTION.** Leakage will come from the supply line and possibly cause water damage to your house.

5. Turn water supply or shut-off valve back on and check for leaks. If leaks occur, tighten nuts slightly.

Limited Lifetime Warranty

This Wasserman® product is warranted to be free from defects in material or workmanship under normal use for the lifetime of the product. Any part of the product found to be defective during normal use will be replaced at our discretion. Warranty protects finish against tarnishing, flaking and discoloration.
